

Project Design Phase-II

Data Flow Diagram & User Stories

Date	03 October 2022
Team ID	PNT2022TMID53022
Project Name	Nutritional Assistant Application
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Nutritional Assistant Application:

For the Nutritional Assistant Application, the data flow diagram is drawn from the perspective of the users. The user, once logged in, can access various resources to track, edit, update and maintain their calorie tracker journey and can also link their social media to compare their progress with friends.

Additionally, the user can also upgrade to access premium features with a one-time payment, made through their mode of choice.
